

Prestolok PLM

Push-to-Connect Fittings

Products for use in the food industry must conform to specific requirements, dependant upon the application. The Parker PLM fittings with a high phosphorus nickel coating conform to FDA standards. Excellent resistance to high pressure, temperature and aggressive washdown fluids make PLM fittings an ideal solution in applications involving direct contact with food products. The push-to-connect ends reduce assembly time by as much as 30 seconds per assembly when compared to standard compression type fittings.

Compatible tubing:

ParFlex Polyurethane Series HU
Parflex Nylon Series NR
Parflex Polyethylene Series PE
and Fluoropolymer FEP

Contact Information:

Parker Hannifin Corporation
Fluid System Connectors Division
300 Parker Dr.
Otsego, MI 49078

Product Features:

- Excellent resistance to high pressure and vacuum
- Materials conform to FDA standards
- Polymer components meet UL 94 V-0 flammability requirements
- Spring collet gripping for long term resistance
- Can be used in the food industry
- All PLM fittings are Silicone free

ENGINEERING YOUR SUCCESS.
